

A UGT84A2 retains coumarin reactions as hydroxycinnamate calls decline

Hydroxycinnamates

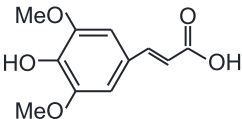

Caffeic acid

Y18 only

Ferulic acid

Y18 only

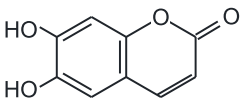

Sinapic acid

Y18 only

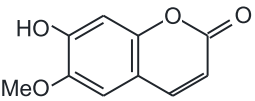

All three positive only in Y18

Coumarins

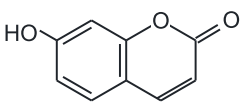

Esculetin

Both screens

Scopoletin

Y18 only

Umbelliferone

Both screens

Two remain positive in both screens

B Series profiles distinguish selective and broad contraction

● Y18 □ M25

Hydroxycinnamates

Coumarins
